

COURSE PROSPECTUS / SPRING 2026

Studio for public climate decisions

This prospectus combines program rationale, draft copy, studio logistics, and communications notes for a public workshop poster.

Course name in catalog

Climate Data Stories for Civic Action

Instructor note

Dr. Maya Chen leads the studio. Visiting reviewers are not co-instructors.

Why this studio exists

Climate and resilience teams often have credible datasets but struggle to turn messy evidence into public narratives that support decisions. The studio is designed as a working practicum, not a software demo.

The public-facing course name settled late in planning. Earlier labels appear in notes because staff reused old files during copy review.

Copy history

Data Stories for Climate Action; Climate Dashboard Sprint;
Resilience Evidence Lab

Catalog language

Climate Data Stories for Civic Action

Margin comment: avoid promising a certificate until continuing education review is complete.

Participants and working assumptions

The studio is written for city staff, nonprofit analysts, and community organizers working with climate or resilience data. The common thread is civic communication: participants need evidence to survive public scrutiny without becoming a technical report.

- Participants may bring local hazard, infrastructure, service, or budget data.
- The poster should not imply the course is open to a general beginner audience.
- The tone should be practical and public-service oriented, not academic recruiting copy.

Partner comment

Civic Futures Accelerator appears in internal sponsorship notes only; it is not part of the public poster copy.

Schedule revision log

Version	Timing	Status
early hold	April 8-24, 2026	superseded
staff note	late April, time TBA	do not publish
catalog	Wednesdays, May 6-27, 2026, 6:00-8:15 PM	use for public copy

Location note

Room assignment remains internal; do not write venue TBA on a poster.

Application line

Apply by April 22, 2026 at civicdata.example/apply

Studio sequence

Session	Working focus
Week 1	Framing messy public datasets as a civic question.
Week 2	Accessible charts, map captions, and plain-language caveats.
Week 3	Drafting a one-page action brief for a local decision.
Week 4	Peer review and public-facing poster language.

- Frame messy climate datasets as clear public narratives
- Build accessible charts and map captions for nontechnical audiences
- Leave with a one-page action brief for a local resilience decision

Partner FAQ

Is a certificate included?

No public promise yet; continuing education review is pending.

Is there a tuition line?

Tuition is not yet published.

Is there a registration cap?

The cap of 32 is an internal planning number.

Can old titles stay in artwork?

No; old titles belong only in archive notes.

Communications handoff

Use the catalog title Climate Data Stories for Civic Action with Dr. Maya Chen and the approved Wednesday evening schedule. The poster should reduce the studio to three benefits rather than copying this prospectus.

Designers should make the course promise feel practical: evidence, accessible visuals, and a short action brief. Keep the instructor and schedule visible, but avoid turning the poster into a registration form.

Public copy fragment

A four-week studio for turning local climate evidence into decision-ready public stories.

Archive appendix

April 8-24, 2026; Tuesdays and Thursdays; late April; time TBA; venue TBA; tuition not yet published; certificate pending; registration cap of 32; Civic Futures Accelerator; Center for Planetary Informatics; waitlist note

Production note: if space is limited, omit the application URL before omitting the three learning benefits.
